

Sergio Tomas

Solutions Architect • Tech Lead • Front-end Specialist • Full Stack • Full Cycle Developer

São Paulo, SP, Brazil | (11) 94462-0110 | jobs.sergiotomas@gmail.com | linkedin.com/in/sergiottomas

PROFESSIONAL SUMMARY

Principal Software Engineer and Software Architect with 14+ years of experience in software development, serving as the technical reference for architecture and system design. Proven track record as a solutions architect and technical lead at companies such as C&A and Claro, defining architectural standards, designing scalable, highly available systems, and driving products end to end.

I apply AI Engineering in a structured way: I integrate generative AI, LLMs, and AI agents into the development lifecycle and into the solutions I architect, always grounded in solid engineering fundamentals (well-defined architecture, code review, automated testing, observability, and security). I use AI to accelerate delivery without compromising quality, predictability, or maintainability. I combine strategic business vision with deep technical expertise in front-end architecture (React and Next.js), back-end with Node.js and Java, and cloud environments (AWS, Azure, and GCP).

TECHNICAL SKILLS

Front-end	React (Redux, Redux-Saga, Context API), Next.js, Vue.js, Angular, HTML5 (semantics, accessibility, SEO), CSS3 (Flexbox, Grid, responsive design), micro frontends, design systems
Back-end & APIs	Node.js (Express, NestJS, GraphQL), Java (Spring), RESTful APIs, VTEX IO
Databases	SQL (MySQL, SQL Server, Oracle) and NoSQL (MongoDB, Firestore, DynamoDB)
Cloud & DevOps	AWS, Azure, Google Cloud, CI/CD (Jenkins)
Architecture	Software design, software and platform architecture, system design, ArchiMate
AI Engineering	Claude Code, Spec-Driven Development (SDD), MCP (Model Context Protocol), RAG (Retrieval-Augmented Generation), LLMs and AI agents

PROFESSIONAL EXPERIENCE

Stellar Gaming

Principal Software Engineer

Jan 2024 – Present • Belo Horizonte, MG

Responsible for Software Architecture and the technical reference for developers.

- Create scalable solutions and new products end to end.
- Technical leadership on all software engineering matters.
- System design of the main projects.
- Share knowledge and take part in technical forums with other squads.
- Assessments and audits of internal and external system solutions.
- Build generative AI applications and solutions using LLMs, RAG (Retrieval-Augmented Generation), and MCP (Model Context Protocol) integrations.
- Drive AI Engineering across the development lifecycle with Claude Code and Spec-Driven Development (SDD), while upholding architecture standards, code review, and automated testing.

DOMVS IT

Software Engineer

Jan 2023 – Jan 2024 • São Paulo, SP

- Developed the main website of a DOMVS IT client, using Next.js as the core stack.
- Took an active role in front-end architecture and standards decisions.

C&A Brazil

Senior Solutions Architect

Feb 2022 – Jan 2023 • São Paulo, SP

Responsible for corporate architecture standards, solution design, adoption of new practices and technologies, and technical leadership.

- Contributed to the design and implementation of strategic #CeaFashionTech solutions.
- Researched, tested, and drove the adoption of new technologies and solution patterns.
- Supported squads and fellow architects in gathering architectural requirements and designing solutions.
- Documented IT standards and practices and built reusable reference components and examples.
- Led assessments and audits of technology solutions and environments, and technically led projects.

Claro Brazil

Systems Architect

May 2017 – Feb 2022 · 4 yrs 10 mos · São Paulo, SP

Feb 2021 – Feb 2022

- Architected new solutions, proposed standards, and documented them in diagrams to help teams reach technical and business goals.
- Leveraged AWS cloud services to improve application scalability.
- Supported tech leads and actively contributed to the company's architecture strategy and meetings, with an ongoing focus on security and efficiency.

Front-end Specialist Developer

Nov 2019 – Feb 2021

- Served as front-end Chapter Leader for agile teams.
- Implemented a micro-frontend architecture that allowed React, Angular, and Vue to coexist in the same project.
- Architected the front-end CI/CD pipeline with Jenkins, working closely with the DevOps team.
- Contributed to the corporate design system (Mondrian) and ran Dev Syncs to strengthen cross-team collaboration.

Senior Front-end Developer

Jun 2018 – Nov 2019

- Introduced the Vue.js framework into the project.
- Owned the rollout of the company's rebranding on the website.

Front-end Developer

May 2017 – Jun 2018

- Delivered new features for the logged-in area of the website using Vue.js, HTML5, and CSS3, with Jest unit tests and front-end best practices.

Resource IT Solutions

Apr 2016 – May 2017 · São Paulo, SP

Programmer Analyst

- Built websites, hotspots, and web apps with HTML5, CSS3, and Angular on the front end, Java on the back end, and WebCenter Sites as the CMS.
- Migrated web applications from AngularJS (1.x) to Angular 2.
- Created a Cordova web app for tablets (Android and iOS) to manage attendees at local events.
- Developed a "time capsule" web page for bank customers and animated pages for the company's in-office TV screens.

Tugarê | CDM São Paulo

Aug 2014 – Apr 2016 · São Paulo, SP

Programmer

- Developed interactive iPad web apps on CLM platforms (Veeva, Agnitio, and Tabmedia) for the healthcare industry, using HTML5, CSS3, and Zepto.js.
- Designed and built hotspots, websites, and web systems with PHP, MySQL, Bootstrap, jQuery, and WordPress.

Marvin Tecnologia da Informação

Aug 2012 – Apr 2014 · São Paulo, SP

Web Developer

- Built interactive iPad presentations on the Agnitio platform for the pharmaceutical industry (HTML5, CSS3, JavaScript, and Zepto.js).
- Maintained legacy front-end and back-end systems for the energy and pharmaceutical sectors (.NET, SQL Server, Bootstrap, and jQuery).

Atento Brazil

Sep 2010 – Jul 2012 · São Paulo, SP

Web Designer

- Designed and developed corporate intranet pages (HTML and CSS) and created layouts, banners, and graphic materials in Photoshop and Illustrator.

EDUCATION

Bachelor's Degree in Information Systems 2011 – 2015
